

WALID HAMDY

Front End React| Next js

E 01144706724 □ walidhamdy.vercel.app q walidhamdy314@gmail.com
□ Egypt / Cairo

SUMMARY

Dynamic and results-driven Frontend React Developer with 1 year of experience in creating responsive web applications. Skilled in using ReactJS to develop intuitive user interfaces and interactive components. Proficient in translating design mock-ups and wireframes into clean, maintainable code. Experienced in optimizing performance and ensuring cross-browser compatibility. Strong problem solver and collaborative team player dedicated to delivering high-quality solutions on time.

EXPERIENCE

Front End Developer

02/2023 Present

Freelancer

Egypt/Minya

- Developed Responsive Web Applications: Built and maintained responsive and user-friendly web applications for diverse clients using ReactJS.
- Performance Optimization: Optimized application performance by identifying and resolving bottlenecks, resulting in faster load times and improved user satisfaction.
- UI/UX Implementation: Translated design mock-ups and wireframes into high-quality code, maintaining consistency with design specifications.
- Testing and Debugging: Implemented testing frameworks and conducted thorough debugging to ensure robust and error-free applications.

PROJECTS

Learning Management System (NEXT)

05/2024 07/2024

NEXT in Front & Strapi in the backend

- Our Learning Management System (LMS) platform, built with Next.js 14, React, Stripe, Mux, Prisma, Tailwind, and MongoDB, offers a robust and.
- Key features include the ability to browse and filter courses, purchase courses securely using Stripe, mark chapters as completed or uncompleted, and track progress for each course. The platform also provides a personalized student dashboard and a dedicated teacher mode, enabling instructors to create new courses and chapters easily, reorder chapter positions with drag-and-drop functionality, and upload thumbnails, attachments, and videos using UploadThing and secure authentication using Clerk. The ORM is managed with Prisma, and data is stored in a scalable MongoDB database. For a comprehensive overview and to explore the platform, please visit our website

Full Stack Ecommerce App (NEXT)

03/2024 06/2024

NEXT in Front & Strapi in the backend

- In this project, we implemented a wide range of features comparable to those found in major e-commerce platforms. These include CRUD operations, robust filtration capabilities, and authentication options via Google, GitHub, and Microsoft services. Additionally, we incorporated Server-Side Rendering SSR for enhanced performance and SEO. For a comprehensive overview of our features, please visit the website.

EDUCATION

Bachelor of computer Sciences

Sciences Graduated in 2024 with a grade of B GPA 2.91

ITI-ORGANIZATION

Fundamentals MERN Stack)

Graduate project with Mathematica

For my graduate project, I created a web application to solve numerical equations. Leveraging web tools and my Mathematica certification, the website offers efficient solutions to complex mathematical problems.

PROJECTS

Full Stack Blog App (NEXT)

02/2024 03/2024

Next in Front & MongoDB And Prisma in the backend

- In this project, users have the capability to create and read posts, as well as add comments to posts. We've integrated robust filtration functionalities and implemented authentication using NextAuth, Additionally, our project benefits from Server-Side Rendering SSR support for enhanced performance and SEO, For a comprehensive list of features, please visit the website.

Video Calling Zoom Clone (REACT Js)

1/2024 02/2024

NEXT Full Stack App

- Screen Sharing: Implemented screen sharing capabilities to enhance collaboration during presentations.
- Participant Management: Provided tools for managing participants, including muting, removing, and inviting participants to meetings.
- Calendar Integration: Incorporated calendar integration to schedule and manage meetings seamlessly.
- Recording Management: Provided a centralized dashboard for managing and accessing recorded meetings

Car-website (REACT Js)

12/2023 01/2024

Next App

- I developed a car website using Next.js, leveraging an API to retrieve car data. The site places significant emphasis on SEO optimization to enhance visibility on search engines, particularly Google. By utilizing Next.js, I prioritized site speed, ensuring swift loading times for an improved user experience. Furthermore, the website is fully responsive, adapting seamlessly to various devices for enhanced accessibility.

Ecommerce App (React js)

08/2023 11/2023

React & Redux

- Utilizing Node.js for the backend, I crafted a powerful e-commerce platform using React JS, rivaling the functionality of renowned international sites like Amazon. Seamlessly integrating user registration via email, the website offers a smooth onboarding experience. Moreover, I meticulously designed an intuitive admin interface, empowering administrators to effortlessly customize unique elements and oversee all customer orders with ease. This dynamic fusion of technology ensures a seamless user experience and streamlined management for the business
