WORK EXPERIENCE (Projects)

Frontend React (next)

Full Stack Ecommerce App (NEXT)

NEXT in Front & Strapi in the backend
i*n this project* we can do the most features of any big ecommerce Like **CRUD operations** , we have filtration and **authentication** using google or GitHub and Microsoft , and we have a **SSR : Server Side Rendering** and more more features you can see that in the website

Full Stack Blog App (NEXT)

NEXT in Front & MongDB And Prisma in the backend
iin this project , the user can add any Post and Read All Posts , user can add comment in post we have filtration we have authentication Using **NextAuth** and we have a **SSR :** Server Side Rendering support and more more features you can see that in the website

Video Calling (Zoom Clone App) NEXT

create a clone for zoom using tutorial in YouTube in this app we can do video call and do meeting and share link with any one , you can record any call and watch in any time , authentication , more Features

Car-website

i use Next js to create a website It deals with an API to obtain car data On this site, much attention has been paid to SEO and search engines to increase its visibility on Google search engines if it is uploaded to Google. Also, by using next js, I increased the speed of the site Also, the site is responsive to all devices

WALID HAMDY

FRONTEND(NEXT)

Ecomerce-App

I use Backend Created By **Node**
Using **React JS,** I created an **e-commerce** website that has all the features found on most international websites such as Amazon. On this site you can register using your email I designed a dedicated interface for the admin so that he can modify the unique elements on the site and also review all the orders requested by customers.

Ecomerce-Design-Only

A very distinctive design for an online store selling foundations using Sass To train on it The website consists of 4 pages, all of which are static With many interactions using javascript

TO WHOM IT MAY CONCERN,

I am writing to express my interest in the Frontend Developer position. With a Bachelor's degree in Computer Science in Minya University and over 1 year of experience in frontend development, I believe I am well-equipped to contribute effectively to your team.

Throughout my career, I have successfully developed and maintained user-friendly and responsive web applications and websites using technologies such as HTML, CSS, JavaScript, and ReactJS. I have a proven track record of delivering high-quality code and implementing best practices to enhance user experience.

I am excited about the possibility of joining your team and would welcome the opportunity to discuss how my background, skills, and enthusiasm can benefit the Company .
 Thank you for considering my application. I look forward to the opportunity to speak with you soon

SINCERELY,

WALID HAMDYKHLAF
